

Mucopren® soft Delivers what it Promises.

Mucopren® soft

Denture relining material with permanently soft A-silicone.

Reliable, efficient and comfortable. Mucopren soft - a denture relining material of assured quality which has many advantages. Mucopren soft is guaranteed to bond to the denture base long-term, and its smooth, hydrophobic silicone surface makes it very difficult for bacteria to settle. Other advantages include a short setting time and adequate working time as well as a new practical cartridge system which makes the material easy to apply and dispense accurately. A very promising material indeed!

Mucopren® soft – The advantages at a glance:

- The newly developed Mucopren adhesive guarantees excellent bonding on acrylic dentures, prevents the lining separating from the denture and also prevents gaps forming between the denture acrylic and reline silicone.
- The smooth, hydrophobic silicone surface prevents inflammation of the denture-bearing tissue, ensuring that the denture remains hygienic and can be worn for many years.
- Its permanent elasticity provides a high degree of comfort and relieves critical mucosal areas.
- Mucopren silicone sealant in cartridges forms an excellent bond with the reline silicone, guarantees easy handling and gives a smooth, shiny surface at the silicone/acrylic margin.
- The excellent mechanical properties of the reline silicone (e.g. tear resistance, elongation) ensure that it is easy to use and can withstand high stresses.
- User-friendly setting properties.

Working and setting times

Direct relining

Total working time: 2 minutes 15 seconds
Intraoral setting time: 3 minutes 15 seconds

Final set: 5 minutes 30 seconds

Indirect relining

Total working time: 2 minutes 15 seconds
Intraoral setting time: not applicable
(> 20 minutes in a pressure vessel)

Final set: approx. 25 minutes

Mucopren® soft – Permanently soft polyvinyl siloxane reline material for direct and indirect relining

Mucopren soft system S-50 Basic set, Cat. No. 28105

Mucopren soft system S-50 Basic set + Applyfix 4, Cat. No. 28106

Mucopren soft reline silicone system S-50, 2 x 50 ml + 12 mixing tips, Cat. No. 15687

Mucopren silicone sealant system S-50, 1 x 50 ml + 10 mixing tips, Cat. No. 15686

Mucopren adhesive, 10 ml, Cat. No. 14203
